Remote network portal software. Allows remote control of one PC from another.

Product Description

Portico is a remote control software product to view and fully interact with the desktop of another electronic device over a network. The product employs a client/server architecture that provides the ability to either establish point-to-point communication between a single device and single client, or to serve up the desktop of a single device to many clients. A control arbitration scheme ensures that only a single client has control of a device at any given time. In a manufacturing environment, Portico can be used to provide visibility and control to a machine or process from a remote location within the plant. Portico can also be used by an OEM to remotely troubleshoot a customer machine or process over the internet.

Key Commercial Data

Packing unit	1 STK
GTIN	 4 046356 771146
GTIN	4046356771146

Technical data

License information

Type of software	Remote desktop control
Type of license	Activation

Functions

Basic functions	Remote control software
-----------------	-------------------------

Hardware requirements

Hard disk	≥ 100 Mbyte (minimum (client and server))
RAM	≥ 512 Mbyte (minimum)
CPU	Atom™ or above
Interfaces	≥100 Mbps Ethernet LAN

Software requirements

Operating systems	Windows XP SP3
	Windows 7

Software - VL PORTICO SERVER 1 CLIENT - 2701453

Technical data

Software requirements

Languages supported	German, English, French, Spanish, Italian
